EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 7, line 6, "said" has been deleted after "constitutes" and a inserted therefor.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed for the reasons presented by applicant in the Remarks received October 11, 2006.

Per claim 7, while it is known in the art to provide an aeration tank with a free culture, means for selective continuous measurement of the turbidity and means for measuring dissolved oxygen (see, for example, US Pat No 4,859,341 to Schreiber), and it is known in the art to hold BOD-absorbing floc in an aerated tank (see, for example, US Pat No 4,269,714 to Ishikawa et al.), in the examiner's opinion, the prior art fails to teach or render obvious combining the known elements with an intermediate clarifier and sludge recirculation circuit having the recited positioning and operational elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
